Ground insulation

EPS beads in the crawl space

Is your crawl space too low or too hard to reach for floor insulation from below? Then ground insulation is the solution. We apply EPS beads to the floor of the crawl space, so the cold from the ground no longer reaches your floor.

500+	Free	ISDE
homes insulated	no-obligation quote	help with your subsidy application

Benefits

- \+ Suitable for low and hard-to-reach crawl spaces
- \+ Floor stays intact: we work from the access hatch
- \+ EPS beads are moisture-resistant
- \+ Installed quickly and delivered neatly
- \+ Warmer floor and lower energy bill
- \+ Price based on the actual m², measured on site

Good to know

- ! Generally slightly less insulating than floor insulation under the floor
- ! The crawl space must be accessible via a hatch
- ! For a very wet crawl space we first advise a solution for the moisture
- ! We always assess this beforehand

Subsidy (ISDE)

Ground insulation may qualify for ISDE subsidy, depending on your situation. We are happy to help with your ISDE subsidy application. Whether you qualify depends on your situation and the current conditions.

How we work

1	We assess the crawl space: access, height and humidity
2	The ground is cleared of dirt and debris
3	The EPS beads are applied so the ground is fully covered
4	The exact quantity is measured on site and determines the final price

No rights can be derived from this information. The final specification, thickness and price are stated in your quote.

Free, no-obligation quote
